DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nishikawa et al (US Patent 5,166,693).

Nishikawa et al disclose, in figures 20, 21, 26, and 29, a patch antenna system comprising a dielectric substrate (240,242,244), a patch electrode 222 disposed on the dielectric substrate, a ground electrode 212 disposed on another surface of the dielectric substrate. Figures 26a-26d show the radiating electrodes having two feeding points. The patent to Nishikawa et al also teaches that the circular polarization is excited by applying RF signals with 90 degree phase different to a radiating patch at two feed points, and a Wilkinson circuit, figure 29, is used in the antenna system, see column 16, lines 46-58.

Allowable Subject Matter

3. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The patents to Shoki, Hampel et al, Huang, and Tresselt are cited as of interest showing the patch antenna similar to that disclosed.
